14.47	31.89	1:13.75	2:57.69	6:01.65

### How to determine results using Multi-Disability Standards (MDS) for Track Events

Competitors compete against a multi-disability standard time for their classification.

Place's are determined by the competitor's time calculated against a percentage of the multi-disability standard for that classification.

Competitors are then ranked from highest to lowest percentage to determine places.

**Example for 100 metres -** Boy competitor with classification of T20 has a performances is 16.52 sec

Percentage for determining results is T20 Classification MDS (from table above 11.90) divided by competitors performance times 100 or  $(11.90/16.52) \times 100 = 72.03\%$

**Please Note:** Times in excess of 1 minute may need to be converted to equivalent seconds for ease of determine percentage.

## Multi-Disability Standards (MDS) Tables for Underage Athletes - Effective 1st July 2015

### FIELD - Boys

Classification	High Jump	Long Jump	Triple Jump	Shot Put	Discus	Javelin
F01	1.61	5.72	10.14	12.43	38.02	58.90
F11	1.09	4.31	10.75	9.31	26.87	34.14
F12	1.53	5.70	11.14	12.87	41.84	42.20
F13	1.78	6.30	13.12	12.76	42.67	47.95
F20	1.62	6.40	9.82	14.37	39.52	46.59

### How to determine results using Multi-Disability Standards (MDS) for Field Events

Competitors compete against a multi-disability standard height/distance for their classification.

Place's are determined by the competitor's height/distance calculated against a percentage of the multi-disability standard for that classification.

Competitors are then ranked from highest to lowest percentage to determine places.

#### Example for discus -

Girl Competitor with classification of F55 has a performances of 14.96 metres

Percentage for determining results is competitors performance divided by F55 Classification MDS (from table above 17.94) times 100

or  $(14.96/17.94) \times 100 = 83.38\%$
